Hall Trisving.—Two valuable coats were stelen from the ball of Mr. Blakeley's boarding house on Michigan avenue, on Taesday avening, while the family were at supper.

Man Dogs.-A dog was killed by a

vidence of being rabid.

Catholic Difficulties in Canada.

Drom the Terente Leader, Dec. 17th.]

In Upper Canada, a bitter quarrel has sprung up in the Roman Catholic Church. A pamphlet published anonymously, and professing to state the grievance of which the Irisis Roman Catholics of Upper Canada complain, in this respect, has just made its appearance, it is made up chiefly of matter that at first floated about, in the form of Fly Shests; some of which were signed "Legion," others "An Irisisman," und others again, "An "Irisisman and Pather of a Family." The pamphlet is dedicated to His Holiness, Pope Pinn IX., the Soverenge Pontiff, by "An Asso-" Chiefland, Irisisman, or will be generated to the Pope, for his decision or the merits of the grinders of which it treats. A petition to it grinders of the affray we could not positively learn, but it was probably provoked by Meyers, in order to was decision of Irish Gentiemen." It has been, it seems of the serious of the affray we could not positively learn, but it was probably provoked by Meyers, in order to was decision of Irish Gentiemen." It has been, it seems of the serious and several minor wounds. The wounds are that we have not the remotest idea of who the "Association of Irish Gentiemen." Irom whom this brockure has emanated, may be. That it is really issued by Roman Catholics, and is not of the work of an enemy, we can readily believe; for it is notorious that the complaints of which it treats, have before often been made in private.

Indiana Legislature closed its special session on Christmas morning, having enacted about twenty laws, most of them of great importance to the State.

was probably provoked by Meyers, in order to take revenge on Pennel for dacharging himPennel has a had cut in his side, a couple in the face and several minor wounds. The wounds are severe ones, and it is feared they may prove fatal. Meyers has been committed to await the result.

SERMAN HOURS.—This well-known hotel, on the corner of Clark and Randolph streak, has changed proprietors, and is now order the excellent management of Mears. Trapp & Hale. This sanouncement will, no doubt, be gratifying to their numerous friends and acquaintances throughout the Northwest, where these gentlemen are well and favorably known, as fair, onergetic and successful business mes. The traveling public may look to the Sherman House for a comfortable and convenient place to stop, where they will be well treated to all the substantials as well as the delicacies of the season.

**The Weathers.—The memory of the oldest inhabitant runneth not back to the time when the cliticens of this locality have experienced so mild and open a winter as the present. Every cold snap of three or four days is sure to be succeeded by a thay, with a generous accompaniment of rain; which is usually continued for double the length of time. What will be the effect upon the general health, and the success of our Spring crops, time will only determine, but we are fearful it will prove detrimental to both. The river is now clear of ice.

Dearborn Lodge No. 214, L. O. of O. P., held in odd Fellows Hall, corner of Clinton and Palton streets, on Tassday evening, December 28, 1858, the following gentlemen were elected to the respective offices for the cusming term, viz. : J. A. Collins, N. G.; Frank J. Ryan, V. G.; Wm. Brodéricks, E. S.; G. W. Bohannon, P. S.; Renben Cleveland, T.; B. P. Sitts, W.; J. P. Ames, C.; Elijah Shaw, J. G.; J. P. Hatfield, O. G.; Thomas Manahan, Chapilia.

out of State Prison on the 17th of November last, where he had been serving a term of several years for stealing a horse in this city. He pretends to be a fugitive slave from St. Louis.

Hennax Barrier Chunca.—At a meeting of the society of Berean Baptist Church, the following resolution was passed:

Resolved, That we express through the daily papers of this city our thanks to the Chicago Baptist Union, and all who assisted us in raising the liberal amount realized at our festival. By order of the Church.

GREAT WETERS RAILWAY.—The traffic for the week ending, Due. 94, is no follows:

CHICAGO, THURSDAY MORNING, DECEMBER 30, 1858.

EXPENSITY for the Holidays, and at prices to suit the times, Messra George W. Stevens & Co., corner of Lake and Dearborn streets, are offering their immense stock of Jevelry, Silver Ware and Fancy Goods at remarkably low prices. The Store contains every imaginable article of the newest and most elegant design, and our only fear is that those oning to purchase a Holiday present will be treabled amongst the many articles exhibited which to choose.

Coas Berrine IN Locomovives, &c.—At a meeting of the "Institution of Engineers in Scotland," on the 27th of October last, the President, Prof. W. J. Macquorn Bankin, in an address on the recent progress of practical seivece, said: "The use of coal instead of coke, as fuel for locomotives, is rapidly spreading, with most beneficial results. The advantage of coal over coke, in point of cheapness, is so well known as to need no comment, and members of this Institution must have had occasion to observe the great superiority of coal over coke in raising and maintaining a high pressure of steam—the effect of which is, that the same engine which with coal as fuel can be worked ex-

served in the comet. It is written in a plain in, readily understood even by an unscientific

Crime in New York.

rice put together, and who has been for airty years a post capalai, was an outrage which could have been prompted by but one spirit, that of Southern last for domination. The act which deposed Com Stuart, placed Shubrick of S. C. President of the Board which did it, in his rank at the head of the Navy. The recolution said to have been first moved or suggested by Brown, of Ministappi, designed to create Com. Stuart, Admiral, is highly honorable to the mover, and I hopewill pass unanimously.

It is not denied that Douglas expressed in one of his Southern, speaches, the sentiment that "nature had drawn and marked a line upon this continent, north of which the earth should be cultivated by free labor, and south of which it should be tilled by slare labor." This is about the most dangerous position that a pub-

nesses he calls are proven to be so much into icated at the time that they were meapable testifying to what transpired. All three of it Judges concur in the statements, and their en dence is corroborated by many others, whi

National Democratic vote in the same proport at that cast for the other parties, the bala was the result of systematic fraud and ball suffice, and that is these precipites along the state of the state

Miscellaneous Items. This City Council of Mayaviile, Ky., have cut, down the salary of the Mayor from \$500 to \$100.

The commissioners and contractors employed in boring the Artesian well, in the Ohio State House, have the right kind of aponts. Notwith standing great difficulties the well has been sunk to the depth of 1,785 feet; and the boring is going on at the rate of about seven feet a day. Crrissing of the United States have lately taken possession of several valuable grano islands, and the rate of about seven feet a day. Crrissing of the United States have lately taken possession of several valuable grano islands, arther's, Howland's, and Christmas islands, arther's, Howland's, and Christmas islands, at the last named of which there is a large and safe barbor, and almost the whole island, forty miles by fifteen, is covered with guano from one to ten feet deep.

Col. Alsear Pixe hunts wild grouse in the Indian country west of Arkansas with a piece of artillery, a six pounder, which he hauis into the prairte, loads with a pound of powder and a quarter of a bag of surkey and swan shot, and lets drift-spint bill flocks at 300 yards, and sever

ranges sheir teeth, besides dressing their hair, and attending to the making up of their persons genesally. Some who parsens this business can produce the required quality of paleness or color to sail various times and circumstances, and can make the subject tanguidly interesting or brilliantly handsome from the outsens of a small box.

Statistics or was Careous Churaca.—The Metropolitan Catholic Almanac for 1859, just insued, contains the following statistics in reference to the present pogdition of the Casholic Church in the United States, contrasted with its condition in the years 1859 and 1849:

the State rights doctrines taught or manaco and Jefferson—the fathers of that faith."

— Francis Hock has been in prison in Cincinnati since September, on an indictment for passing a counterfeit bill. It has just turned out that the bill is genuine.

— Capt Spancer, of the packet ship Daniel Webster, arrived at Boston from London, reports that on the outward passage he pansed a large number of dead bodies, swollen and disiorised, with the ses birds preying on them. They were thought to be the remains of the passurers of the steamship Austria. They were nearly together, in groups of two or three.

— The Charlotteville (Ya.) Adoccate says the demand for slaves is unprecedented. At several large sales in that county lately, busides the professional traders present, every other man seemed anxious to purchase one or two for his own use. The prices given are enormous. From twelve to fifteen hundred dollars for men, and from a thousand to thirteen hundred for women are the limits.

— At a political meeting in New York, Saiur.

soldiers.

— Timothy Alden, the inventor of the mu-chine for setting and distributing type, so much talked of about two years since, died in New York on the 4th instant.

— The President, it is said, does not recognise Forsyth's pretensions, as still being the in numbers of the Maxican Mission, and he will sp

FULLY dented to the original positivity as well in the industriant of the sensitivity as the sensitivity of the sensitivity as well in the industriant of the sensitivity as well as the industriant of the sensitivity as well as the sensitivity of the s

self to the external flanks of the primeral mountains, where they front the san, and where the rivers desced from their backs. Why it has here been found only in grains, scales and mail inspa, may be time illustrated; I suppose myself at my caup fire in the wilderness, engaged in boiling rice; into a came kettle of boiling water it throw a cap of rice. This rice, after a time, settles by his specific gravity, into a sedimentary mass beneath the water—the water above relains a mility whiteness. This whiteness is due to the presence of minute particles of rice remaining supended through the body of the fluid. Being from into lee, this condition remains fixed in solid form. The presence of the gold in the surfacerous rocks, has find a similar origin and presentationation the surface rocks and welms only that have as yet attracted attention—it is bessent that Wester, die minerthere 1.0

In aiths varieties, done in beautiful style and at modern PIKE'S PEAK AND THE SIERRA SAN JUAN ADDRESS BY COL. WM. GILPIN, ON THE GOLD PRODUCTIONS OF AMERICA Physical geography arranges the surface of the continents into basins and the mountain crests which divide them. Thus the basin of the Missimppi is that surface which, being drained by all the confluent branches of this river, discharges its fresh waters into the Guli of Mexico. This surface is an undulating, calcarcous plain of one million two hundred thousand square miles of area: it is ambraced entirely within the temperate nonegicocupies the heart and splendor of our continuity, and is the most magnificent dwelling piace finite do the year of the second pain of our continuity, and is the most magnificent dwelling piace finite system of sivers - the basin of the St. Lawrence, the basin of the Seakatchewan of Hudson's Say, and the arcule basin of the McKenzis-resting upon one another and upon the basin of the Missispipi, form together one continuous expanse, geologically, uniform and identical. This immense expanse defines itself as the calcarcous Plain of North America. Limestone, horizonally stratified, underlies this whole expanse, being formed, tike cheese from milk, from the sediment and pressure of the ocean which once rolled ever it, but has now retired.

This calcarcous plain, thus forming a unit in physical geography, embraces four-sevenths of the area of our continent. It is encompassed all round by a circuit of primary mountains, within which it forms an amphitheatre. These mountains are the Alleghamies, towards the Atlantic, the Cordillers of the Sierra Made and the Andes, towards the Pacific. The mouths of the great rivers form the doors or outlets through them to the oceans. This circumferent wall of mountains is of immense breadth toward the Pacific, it is the second unit in physical geography, and covers two-sevenths of the area of our continent. External to the mountain formation is the third unit in physical geography, and forms all round one seventh of the area of our continent. External to the mountain formation is the third unit in physical geography, and forms all round one seventh of th rocks. The same stapendous scale holds is the abundance of the melas, their parity and their widely extended distribution.

Lis your request that I speak especially, on this evening, of the gold production of our country, and specifically of the region surrounding Pixe's l'eak and the Sierra Sas Juan. Specific gravity guides us to discover the rocks in which the precous metals may be found and where they are totally absent. If into a hollow pillar of giass there be poured a quart of quick aliver, one of water, one of oil, and one of alcohol, these liquids will rest one upon the other, in this order: if a piece of gold, of troe, of wood, and a feather, be thrown in, they will sink—the gold to the botton, the iron to the quickniver, the wood to the water, and the teather to the oil. If this mass be congealed to tee, this arrangement will remain soild and permissent; the gold must be sought for sedimentary to the water; the wood sedimentary to the water; the wood sedimentary to the vater; the wood sedimentary to the water; the wood sedimentary to the water; the wood sedimentary to the oil. In the great order of antara, a similar arrangement holds in the rocks which compose the globe of the earth, and in their contents, once all liquid but now parmanent; soild in the order of their relative specific gravities. It is the primeral mass, then, of the Manntain Wormstine which leaves a serificant.

PRESS AND TRIBUNE

have not search for the sedimentary mass; the possibility to do which, now first presents casely awe advance within the labyrinth of the volcasian masses and canons of the Platen.

My own personal experience, carned during three military expolitions made between the press 1844-49, readered desperate from the them anknown complication of the country, added to the numerical strength and swage character of the indians, is not without value. The facts then and since collected by me are so numerous and so positive, that I entertain an absolute conviction, derived from them, that gold in mass. and in position and infinite in quantity, will, within the coming three years, reveal theself to the energy of our pionners. All the precious metals and precious stones will also reveal themselves in equal abundance, in this region so propitions to their production. Such a development has nothing in a speculative or theoretical. It comes of necessity in the oster of time, and as an inertiable sequence to the planting of empire in Texas, in California, in Oregon, in Kansas, and in Utah. As these other developments have preceded it in the order of time, and one of a lad around, this now comes to unite, to complete, to consumate the rest, and to give form and power and splendor to the whole.

The inquiry which acquains us with the climats, the agricular sand the domestic geography of the immense region, in still equally interesting and important as its metals. It was appared to the whole.

The inquiry mountain the control of the format promotory, which protocaling seatward from the Gordillers and any of the protocal in the same latitude as Son Francisco and St. Louis (29 deg.), is about 100 miles from each and in the cantre between them. The direction of the Gordillers with the Cordillers, in a supremely grand focal point of primary mountains chains; primary rivers and terminates of the Bother from the Rio Grande of the Cordillers, it is from which in the surfer of the Gordiller and the miles of the Flatte river of the Gordiller a Calcarcous Plain is a uniform secondary forms it on of limastore, horizontally deposited and straitified. The Mountain Formation is of grantic, presenting the primeral crust of the globe rent by volcane forces and elevated vertically. The Maritime Slope presents the external mountain been partly revealed and partly covered by volcanic peaks and means, channelled as a high elevation, through perforated of shot. This is accomplished by pouring liquid lead, at a high elevation, through perforated moulds. Each pellet of lead descending into the air is formed, as it cools, into a sphere, by the invisible force of gravity. The globe of the earth has had a singular origin—once a liquid mass, now a solid, gravitating sphere, and as we inhabit it. Geology explains how the main soft his great sphere has arranged itself, in nooling, into layers enveloping one another, like the successive scalings of an onin. Specific gravity accounts for the relative positions of these layers, one upon the other, and explains to us when and how to penetrate to their metalliferoms contents. It is in the prime val rocks excessively that the precious metals and precious stones are found. The base metals are contained in the calcarcous or secondary rocks. The same stapedous scale holds in the submadance of the metals, their purity and their widely extended distribution. its astrounding region, that I have merred to conduct you, and here stop, in the midst of the veritable arcane of the mountain formation and its metalliferous elements.

The Sierra La Platte is 400 hundred miles in leugth, having its cours W. S. W. Along its Dorsal crest are volanic masses penetrating to perpetical snow; its flanks descend by immense ierraces of earboniferous and sulphurous limestons. All formations of the globe here come together, mingle with one another, acquire barmony, and arrange themselves nice by side in gignatic proportions. Lava, porphoritic grant, anotatone, limestone, the precious and base metals, precious atoons, salt, marble, coal, therm and the strength of the st neer people within this region, havy be exactly implanted by what to already done within the region of the growth of already done within the region of the growth of already done within the region of the growth of already of the state of the state of the growth o

One of the chivalry is, it sees ut the obiter dicts of the Dred Sc in Nebraska. He is claiming an the right to hold slaves in the without authority of local law slaves themselves, having waited the circumstances of the case w for the "unfriendly legislation" n Douglas' Freeport speech heir owner, Mr. Nuckols, avers, be by certain Heaven-delying, C breaking and otherwise ungedly fa the east bank of the Missouri Riv did not come up when the horn kl bed and searched and cusses he was. Niggers are property; had escaped; ergo, Mr. Nuckols was the amount at which his " boys " te, a thing as to leave him wit to hold and 'nary nigger in it, that to look about him for the infidels wi sisted in the rape which he had suffe sisted in the rape which he had suffe Iowa is opposite to Nebraska. It is Republican State—not as black as It is but black enough for Mr. Nuckols' Along its western borders, over aga aha, is a cordon of oburches end scho and well tilled Yankee farms. It thereabouts are addicted to prese praying and of supporting schools as every time in solid phalant against tional Democracy. Mr. Nuckols et them at once. They were the men he ter. They stole his niggers—

them at once. They were the men her. They stole his niggers—gagged, bound and bore their each particular Sambo with a revolver at his head. Mr. neighbors were also excited. Arous a place as Omaha an excitement gotten up. Whisky is plenty, can scarce and loafers are abundant. was soon collected, made up of nois ots, the aggregate wealth of whom why a pound of nigger in any market Republic—men who are daily cut Slavery and don't know it. They meyenty-five in all, armed, as all the pers say, to the teeth; and full of whall the newspapers don't say, to the teeth; and full of whall the newspapers don't say, to the teeth; and full of whall the mewspapers don't say, to the teeth; and full of whall the newspapers don't say, to the teeth; and full of whall the mewspapers don't say, to the teeth; and full of whall the mewspapers don't say, to the teeth; and full of whall the mewspapers don't say, to the teeth; and full of whall the mewspapers don't say, to the teeth; and full of whall the members and abolistonists bein game sought. The last we of them they were prancing around wintention of making a descent upon it lage of Tabor, a Tankee settlement, wh Nuckols, the bereft, and all of Mr. Nuckols, the bereft, and all of Mr. Nuckols, the bereft, and all of Mr. Nuckols, the day of the Nuckols. neighbors, are quite sure the Nuckols's are concealed. We do not know wh people of Tabor propose to do in the ises; but if that Nebraska crew of mando not behave themselves, we are certathere is Puritan blood enough thereal send back a score of the horses of the without riders in their mediant. it riders in their saddles. We
